About cookies

Our website uses cookies to give you an improved user experience. Here you will find information about cookies and how we use them.

Cookies are passive textfiles that are stored in your web browser to enable saving and retrieving information on how you use the website. We use cookies to improve functionality and analyze how visitors use the website.

We will not save any personal information in cookies on your computer.

There are two types of cookies.

- Session cookies are temporary and exist only when you visit the website. They are deleted when you close your browser. The website functionality can sometimes depend on session cookies, e.g., to make a booking, a payment or stay logged in.

- Permanent cookies are stored on your computer when you log in and up to 30 days after, or until you delete them.

You can allow, block and clear cookies in your browser. Please find further information on managing cookies here:
